MESSAGE

Dear Examiner Fisher,

Thank you for agreeing to meet with me today to discuss this application. During our meeting, I hope to discuss differences between the references in the Office Action and the claimed invention. For example, please see the following unofficial amendment to Claim 1:

Claim 1 (Unofficial): An optical pick-up device comprising:
a first light emitting element for emitting first light beams having a first wavelength;

...

and out of an optical path of the first optical system,

wherein each of the first and second object lenses includes a converging portion that converges light and a flange that connects to the bobbin surrounding the converging portion, and

a portion of the flange of one of the first and second object lenses is removed and the other one of the first and second object lenses is arranged to overlap the portion of the flange that is removed so that a distance between the converging portion of the first object lens and the converging portion of the second object lens is equal to a width of the flange of the one of the first and second object lenses that is removed.

Please let me know if you have any questions or comments.

Best regards,
Zach Stern
